# Love Oracle Android Deployment Checklist
Use this checklist to ensure your Android app is ready for submission to the Google Play Store.
## Pre-Submission Checklist
### App Functionality
- [ ] All core features work correctly on Android
- [ ] App handles all screen sizes and orientations appropriately
- [ ] Back button behavior is implemented correctly
- [ ] App functions properly when device is offline or has poor connectivity
- [ ] Memory usage is optimized (no leaks or excessive usage)
- [ ] App handles system interruptions (calls, notifications, etc.)
### Graphics and Assets
- [ ] App icon meets [Google Play requirements](https://developer.android.com/google-play/resources/icon-design...)
- [ ] Feature graphic (1024 x 500 px) is created for store listing
- [ ] Screenshots (at least 2) are captured for multiple devices
- [ ] All images and media assets are optimized for size
- [ ] Splash screen displays correctly
### Performance
- [ ] App startup time is reasonable (<3 seconds recommended)
- [ ] Scrolling and animations are smooth (60fps)
- [ ] App responds quickly to user input
- [ ] App doesn't drain battery excessively
### AdMob Integration
- [ ] Ad units are correctly configured
- [ ] Test ads are working on test devices
- [ ] Ad frequency is user-friendly
- [ ] Ad-free experience works correctly (for premium users)
- [ ] Child-directed treatment flag is set (if applicable)
- [ ] Privacy policy covers ad data collection
### GooglePlay Requirements
- [ ] App targets Android API level 33 or higher
- [ ] App is tested on multiple Android versions (9.0 and above recommended)
- [ ] Privacy policy URL is prepared
- [ ] Terms of service URL is prepared
- [ ] Developer email contact is valid and monitored
- [ ] App content is appropriate for target audience
- [ ] App complies with [User Data policy](https://play.google.com/about/privacy-security/user-data/)
## Store Listing Requirements
### Metadata
- [ ] App name: "Love Oracle"
- [ ] Short description (< 80 characters)
- [ ] Full description (< 4000 characters)
- [ ] App category: "Lifestyle" and/or "Entertainment"
- [ ] Content rating questionnaire completed
- [ ] Contact details are up to date
### Graphics Required
- [ ] High-res icon (512 x 512 px)
- [ ] Feature graphic (1024 x 500 px)
- [ ] Phone screenshots (at least 2)
- [ ] 7-inch tablet screenshots (if targeting tablets)
- [ ] 10-inch tablet screenshots (if targeting tablets)
### Deployment Info
- [ ] Version name (e.g., "1.0.0")
- [ ] Version code (integer, e.g., 1)
- [ ] Android App Bundle (.aab file) generated
- [ ] App signing key is securely stored
- [ ] Release notes prepared
## Final Testing Before Submission
- [ ] Test the final release APK/AAB on multiple devices
- [ ] Verify that crash reporting is working
- [ ] Verify that analytics are working
- [ ] Perform final usability test with real users
- [ ] Check all third-party API integrations
- [ ] Test with both WiFi and cellular data connection
### Firebase Integration Testing
- [ ] Verify real-time database connections and data persistence
- [ ] Test offline data synchronization
- [ ] Verify Firebase Authentication flows
- [ ] Check Firebase Analytics events are being logged
- [ ] Test data security rules in production mode
- [ ] Verify crash reporting is properly configured
### RevenueCat Integration Testing
- [ ] Verify subscription purchase flows
```

- [ ] Test subscription restoration for existing users
  - [ ] Verify premium features unlock after subscription
  - [ ] Test ad removal functionality with active subscription
  - [ ] Verify subscription status persistence after app restart
  - [ ] Test subscription management deep links
  - [ ] Verify receipt validation
  - [ ] Test subscription expiry handling
  - [ ] Check subscription status syncing across devices
- ## Google Play Console Submission
- [ ] Developer account is in good standing
  - [ ] App meets the [Google Play Developer Program Policies](<https://play.google.com/about/developer-content-policies/>)
  - [ ] App meets the [Google Play Developer Distribution Agreement](<https://play.google.com/about/developer-distribution-agreement/>)
  - [ ] All required metadata is complete
  - [ ] All required graphics are uploaded
  - [ ] App is properly signed
  - [ ] App has proper versioning
  - [ ] Target countries/regions are selected
  - [ ] Pricing and distribution options are set
- ## Post-Submission
- [ ] Monitor Google Play Console for review status
  - [ ] Address any policy violations or issues flagged during review
  - [ ] Prepare marketing materials for app launch
  - [ ] Monitor user reviews and feedback
  - [ ] Prepare for future updates based on user feedback
- 
- Remember, this checklist is a guide and may not cover all specific requirements for your app. Always refer to the official documentation.
